

ICP Fiberglass Roofing Sheets

ICP (India) Private Limited

Product Description

ICP Fiberglass roofing sheets are translucent glass fiber reinforced polyester sheets designed for shelter as well as controlled lighting into industrial sheds, green houses, residential and commercial buildings and many other places where it is necessary to have diffused light.

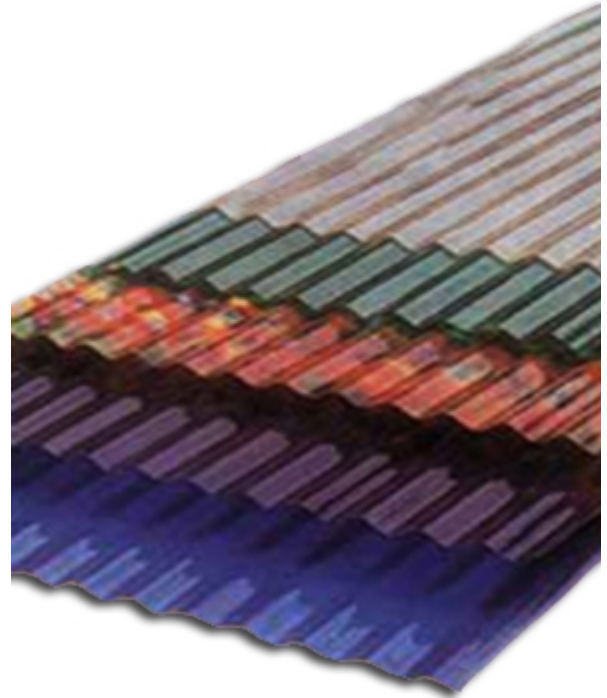

The polyester resin used for making ICP fiberglass roofing sheets is of special grade containing ultra-violet resisting additives and having a refractive index that matches the fiber glass sheet which provides the reinforcement. This account for very high degree of translucency and also screens out harmful ultra violet rays.

FEATURES:

- High strength
- Lightweight
- Does not crack
- Does not warp
- Weather proof
- Shatter proof
- Maintenance free
- Elegant and colorful

APPLICATIONS:

- Industrial sheds
- Warehouses & godowns
- Roof garden restaurants
- Internal skylights
- Car parking
- Porticos
